CAMPAIGN PLANS

Will Attempt to Isolate Strong a not await the arrival of Dr. Con-Fortress; Gorizia is Now Army's Objective

[Associated Press by Federal Wireless] UDINE, Italy, October 6 .- From the recent disposition of troops along the Lower Isonzo front it appears evident that General Calans, in command of the Italian forces operating against Gorizia and Trieste, has abandoned the effort to force the way to the Istrian capital, the defenses of which have been found too formidable to justify the loss of life that attempts to storm them would entail.

The Italian plan of campaign now according to what can be learned, is to concentrate the greater part of the Italian artillery in this front before Gorizia and reduce that fortification. This will permit the advance of the Italian field army to the east and south of Trieste, isolating that city and reducing the operations for its capture to a systematic siege.

The Italian campaign in the Dol-monites and into the Trient section is slowly proceeding, the Italian advance being in the face of tremendous natural difficulties.

LONDON.-Now that 10 shilling | suggestions to the grocers a number of neat and highly attractive designs of show windows containing Hawaiian gold piece of this value may not be contained the grocers to either use in their windows or handled the grocers to either use in the form of special orders this well in the form of special orders the winter of the form of special orders of the form of the form of special orders the winter of the form of special orders of the
